Daet, Camarines Norte, Philippines

An IT graduate seeking an entry-level role where I can apply my knowledge and skills while continuously learning and growing in a professional environment. A motivated, detail-oriented and can work with minimal supervision. I am passionate about creating practical and user-friendly solutions, with strong adaptability, willingness to learn, and commitment to delivering quality work. Known for being honest, enthusiastic, and hardworking, with the ability to work independently or collaboratively in a team while contributing effectively to organizational goals and projects.

WORK EXPERIENCE

E-Commerce (Dev) Intern - Highly Succeed Inc.

February 2026 - May 2026

E-Commerce Sales | Full Stack Developer

- Assisted in real-world e-commerce operations.
- Independently developed and deployed a Project Management and Work Execution Platform using Codex and Cursor AI as part of the company's internal system ecosystem.
- Supported QA testing, system operations, and troubleshooting to ensure smooth workflow execution and system reliability.

PROJECT EXPERIENCE

TRICYPAY: A Smart and Integrated Transportation Management System for Tricycle Operations

June 2025 - December 2025

System Analyst | Developer | UX/UI Design

- Collaborated in a capstone research project that applied the Agile methodology to analyze, design, and iterate system requirements for a comprehensive tricycle operations management system.
- Conducted requirement and process analysis for multiple target users across two related government units, as well as operators, drivers, and commuters.
- Analyzed and designed web-based systems for managing tricycle registration, records, and transactions as well as for monitoring, managing, and resolving tricycle driver's traffic violations.
- Designed system workflows and user interfaces for a mobile application supporting digital commuting features such as transparent fare calculation, real-time reporting, driver assignment, notification and status monitoring.
- Translated analyzed requirements into user cases, system workflows, and UI/UX prototypes, and participated in iterative testing and refinement based on stakeholder feedback.
